DEC wishes from Keli Adams

Monroe Team, have a wonder-filled 4th!

Note from Lori

Check Facebook for the short video replay of today's service for my Dad. Twas very nice!

And good to have completion.

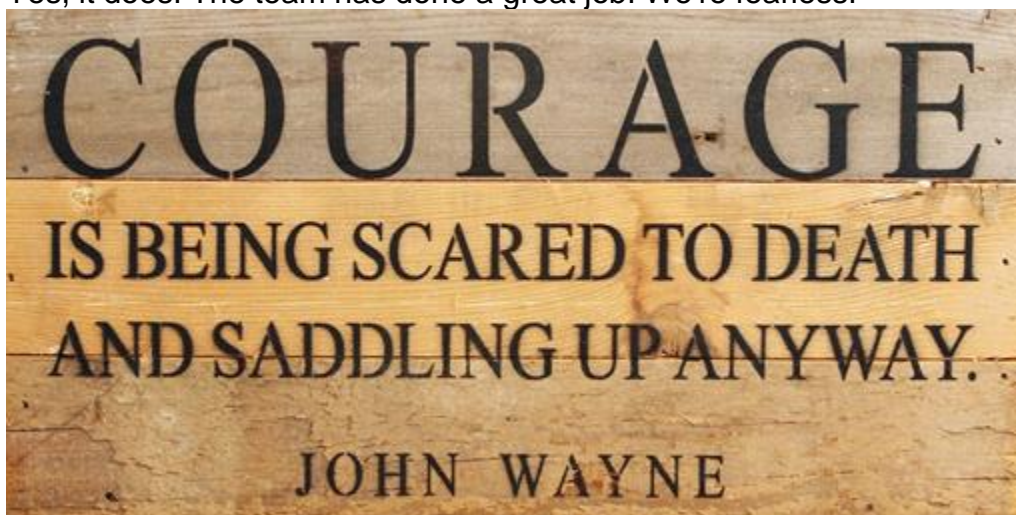

MC2

Had a "surprise visit" to the participants of MC2 Virtual Retreat. They are having so much fun! They couldn't wait to show me all the bent forks and spoons. Yep, group energy doesn't need to be in proximity to be effective. We knew that, and now we have addition proof in virtual retreats. Yahoo!

Another success. Dang. That feels good.

When I sent a similar note to Jenny, she responded with this:

Yes, it does! The team has done a great job! We're fearless!

Note from Charleene Nicely

Thanks Cheryl for organizing this meeting the all-trainer meeting. And thanks to all the presenters! I'm so looking forward to hear about your experiences and to benefit from what you learned.

Together we can!!!

Leslie's request of DEC

Leslie crafted a wonderful message to go out to the DEC members. So, if you notice some extra good vibes this next week, blame them on Leslie!

Subject: The Monroe Institute's Dolphin Energy Club energy support request

Dear DEC member,

A few months ago, we asked all DEC members to collectively provide healing support to the world during the pandemic. You responded. I'm sure you felt the difference it made rippling throughout the field.

Now, I'm asking you to again deploy your powerful collective energies for the Monroe Institute -- all of us, everywhere -- as we navigate the unknown. We welcome the guidance and support of "all those whose wisdom, development and experience are equal to or greater than" our own.

Repair of NPC

Nice work Michael/Larry and all

Paint colors are those picked by the designers of DFH remodel.

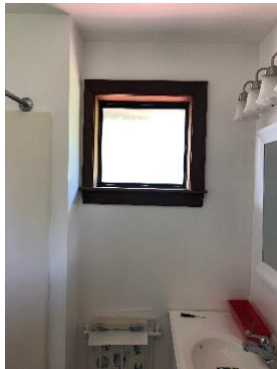

New paint – new wing NPC

Repaired ceiling by tower door

Painted bathroom and stained wood trim

News of note: From Angie

Looks like they might be making our water tank from the email. We might have it installed by next year.

(Angie is being sarcastic...this is the slowest project, ever. Board approved in March of 2019)

Subject: RE: Tank

To: Angie Smith

White is standard exterior topcoat color. Just received copy of fabrication order. Should be similar to below – very clean look for water tank. Don't think Monroe's logo will be on tank. Your tank is smaller – only 2 support saddles and does not have the walkway on top. Jeff did include a level indicator gauge (make inspector Steve Kvech happy) per the fabrication docs. Looks like things are moving.

Have a safe and wonder-filled 4th of July weekend,
Scott, Anne & Smokey (the bear)
